EBURU FOREST ECOSYSTEM

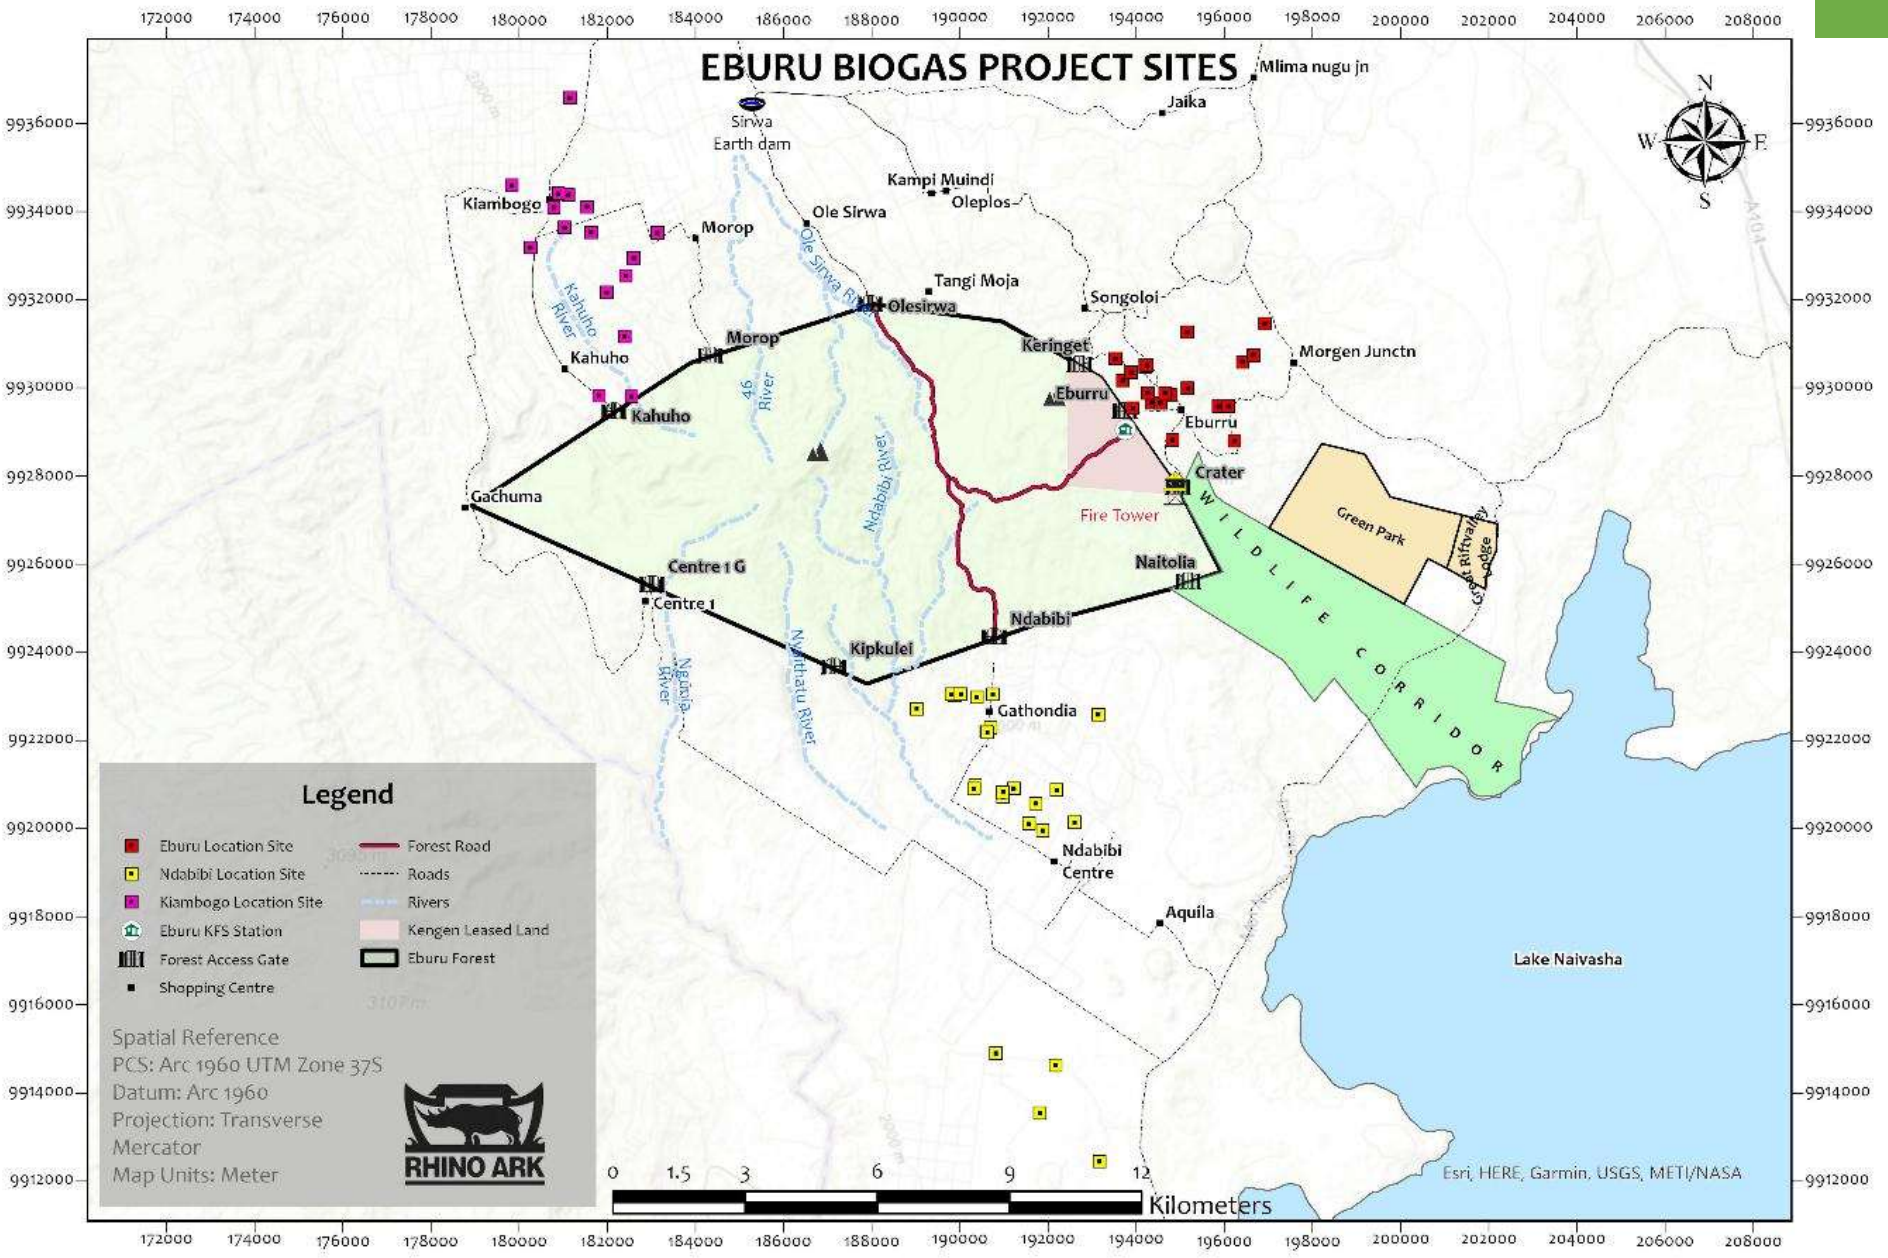

Eburu Highlights(1)

- 43.3km fence maintenance, regular FTC
  - Infrastructure – gates rehabilitation completed
  - HWC new camp at Songoloi, KWS rangers
- Wildlife corridor secured, forum active
  - Wildlife monitoring March 2026
- Community livelihoods:
  - On farm training – 10 trainings, 245 members (2026)
  - Honey project – 39 active members, 510kg/KES 510,000/=
  - Sustainable energy - biogas

Eburu Highlights (2)

- Outreach:
  - Community Conservation Champions
  - Boda boda Road Safety & Conservation Champions (45), 3 lost by attrition
- Conservation education – schools
  - 32 schools
  - CBC/CBE compliant curricula approved by KICD
- Ecotourism
  - Trail maintenance – 4 trails

Sustainable Energy - Biogas Survey

Eburu Sustainable Energy – Biogas Survey

- 61 households surveyed (installations 2014-2025)
- 49% of the units fully functional; 10% partially functional; 41% non-functional.
- Average 75% domestic energy cost reduction
- Qty reduction:
  - Firewood by 78.6%
  - Charcoal by 55.9%
  - LPG by 49.4%
  - Kerosene by 90%.

Eburu Challenges

- Fence
  - HWC - Songoloi fence section
- Outpost infrastructure
  - Inadequate – ablution, unihuts
- Conservation education – schools
  - Dedicated manpower
- Ecotourism
  - Visitor security- ranger support

SOUTH WESTERN MAU FOREST ECOSYSTEM

SW Mau – Outreach (1)

- Conservation Education: 53 schools engaged
- Schools club patrons and CCC were trained on conservation guidebook.
- 25 SW-Mau CCC were trained on RA programs and policies.
- 40 faith-based groups taking conservation to 53 schools on Pastoral Programme (PPI)

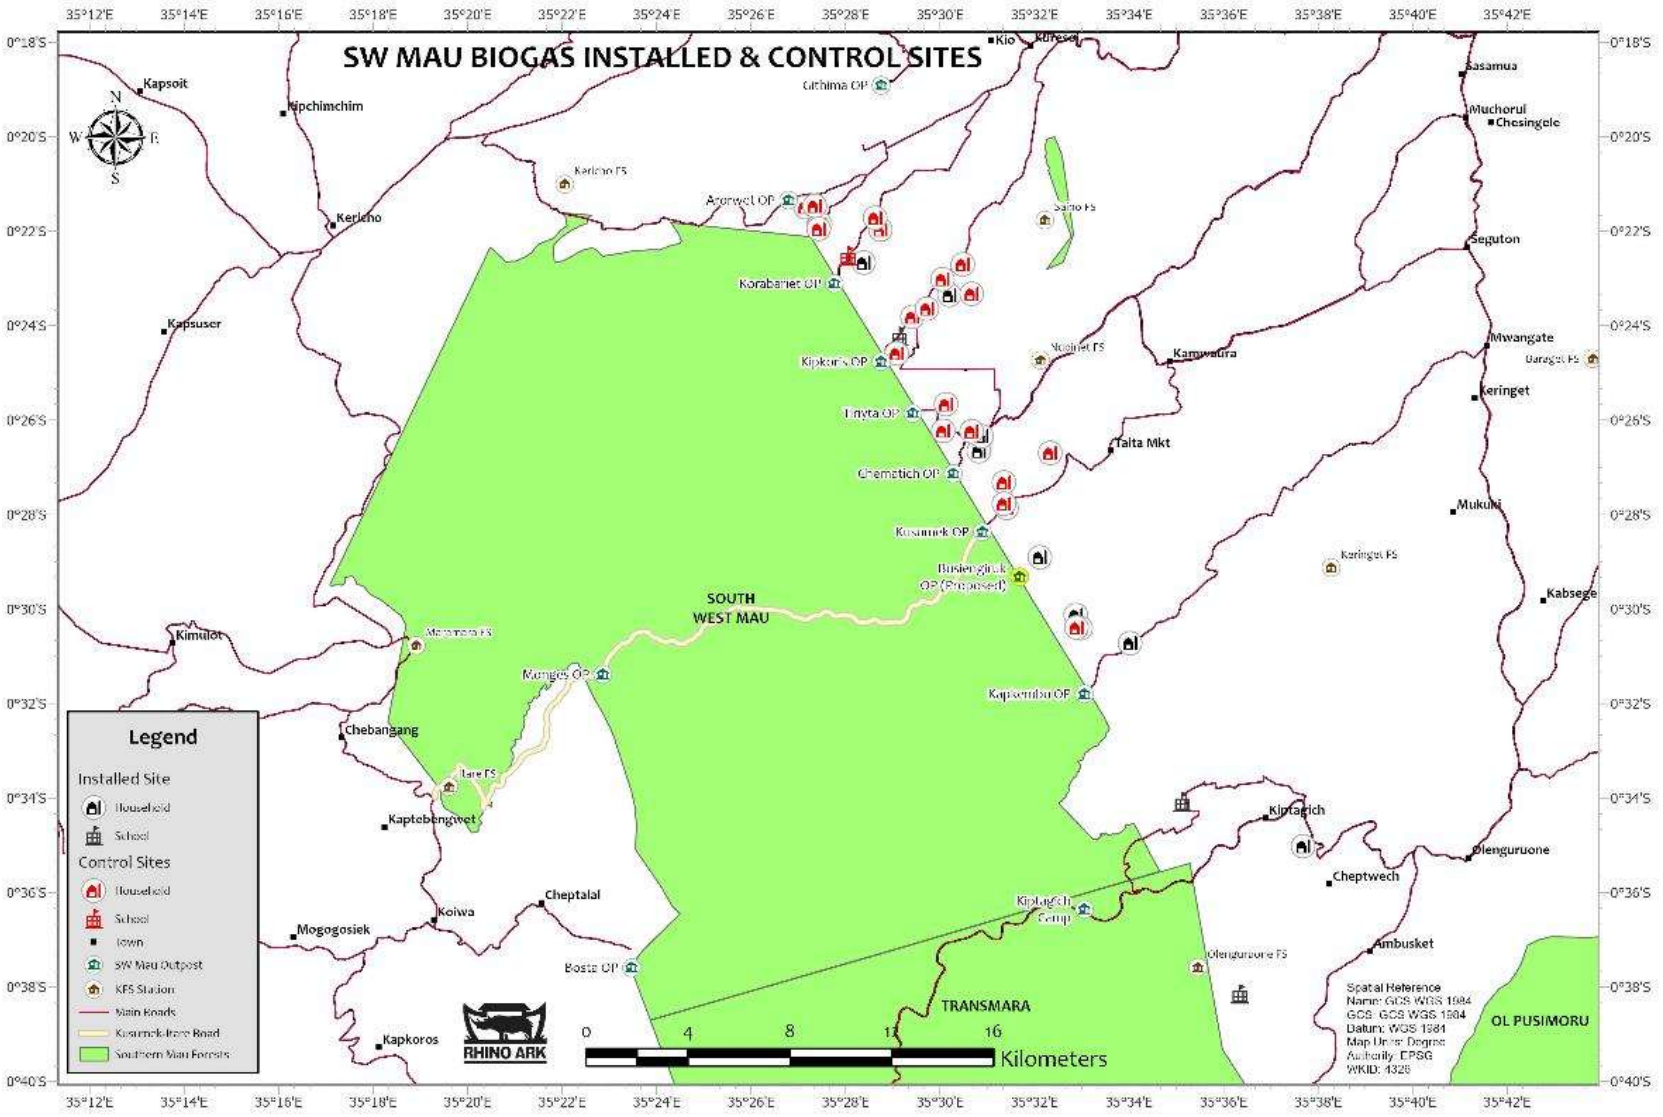

SW Mau – Outreach (2)

- 22 herbalists practising herbal treatment legally after training.
- Energy saving stove installed in 12 schools and working well.
- 6 water tanks installed in 6 schools and working well
- 15 biogas units installed (12 households, 3 schools) – Asilia funded

Sustainable Energy – Biogas Pre-Survey

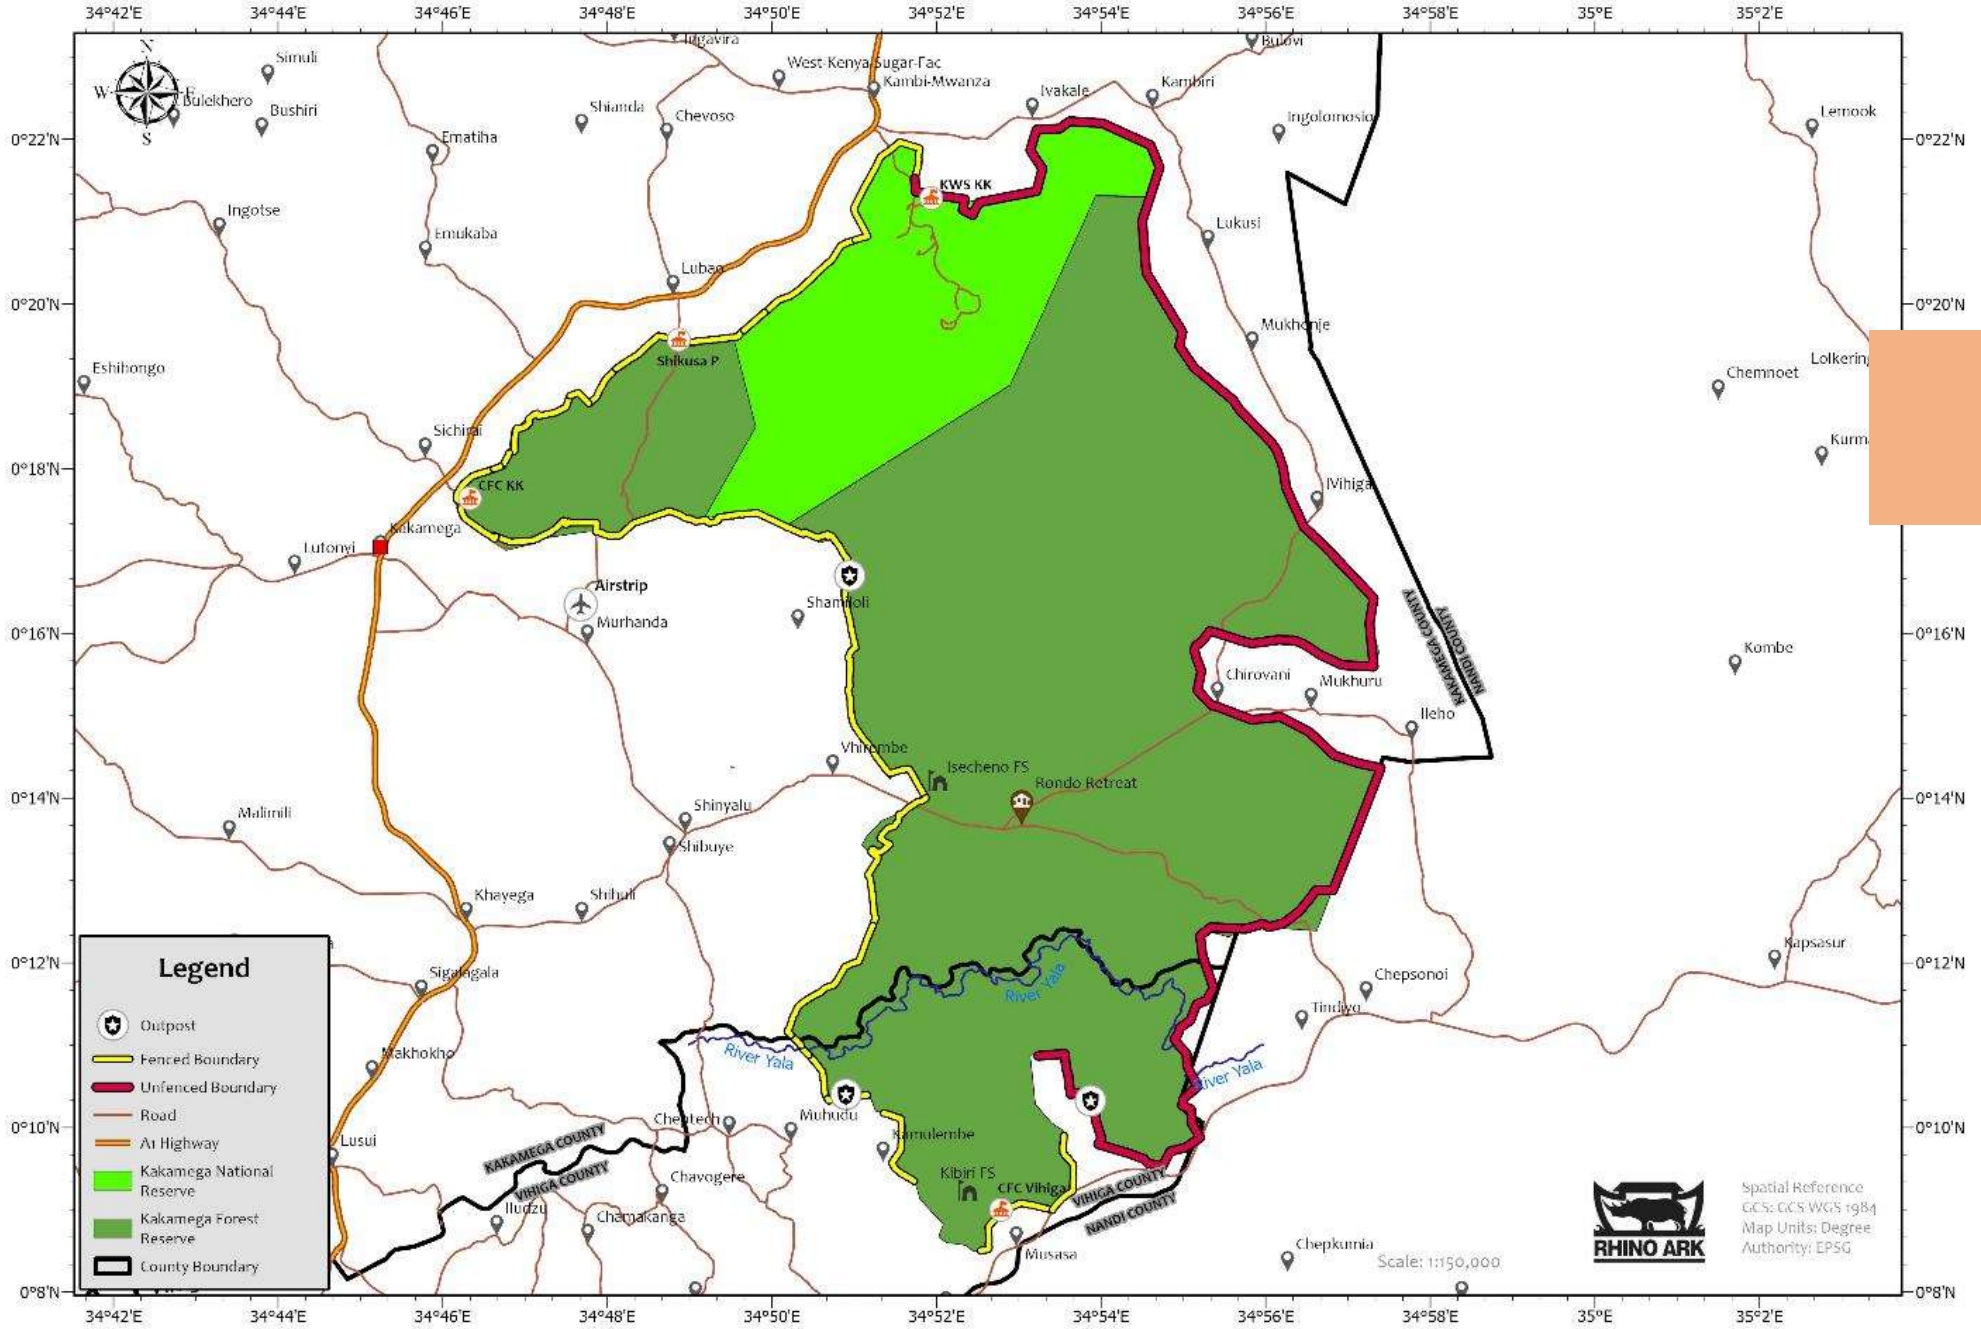

- 34 sites surveyed (pre-installation)
- Fuelwood is the main energy source used at 33 of 34 sites (97%) for cooking and heating.
- Solar energy lanterns or panels was used for lighting in 13 sites (38%), .
- Electricity was used mainly for lighting in 11 sites (32%)
- Charcoal is used at only 2 sites, LPG and kerosene at none.

Sustainable Energy – Biogas Pre-Survey

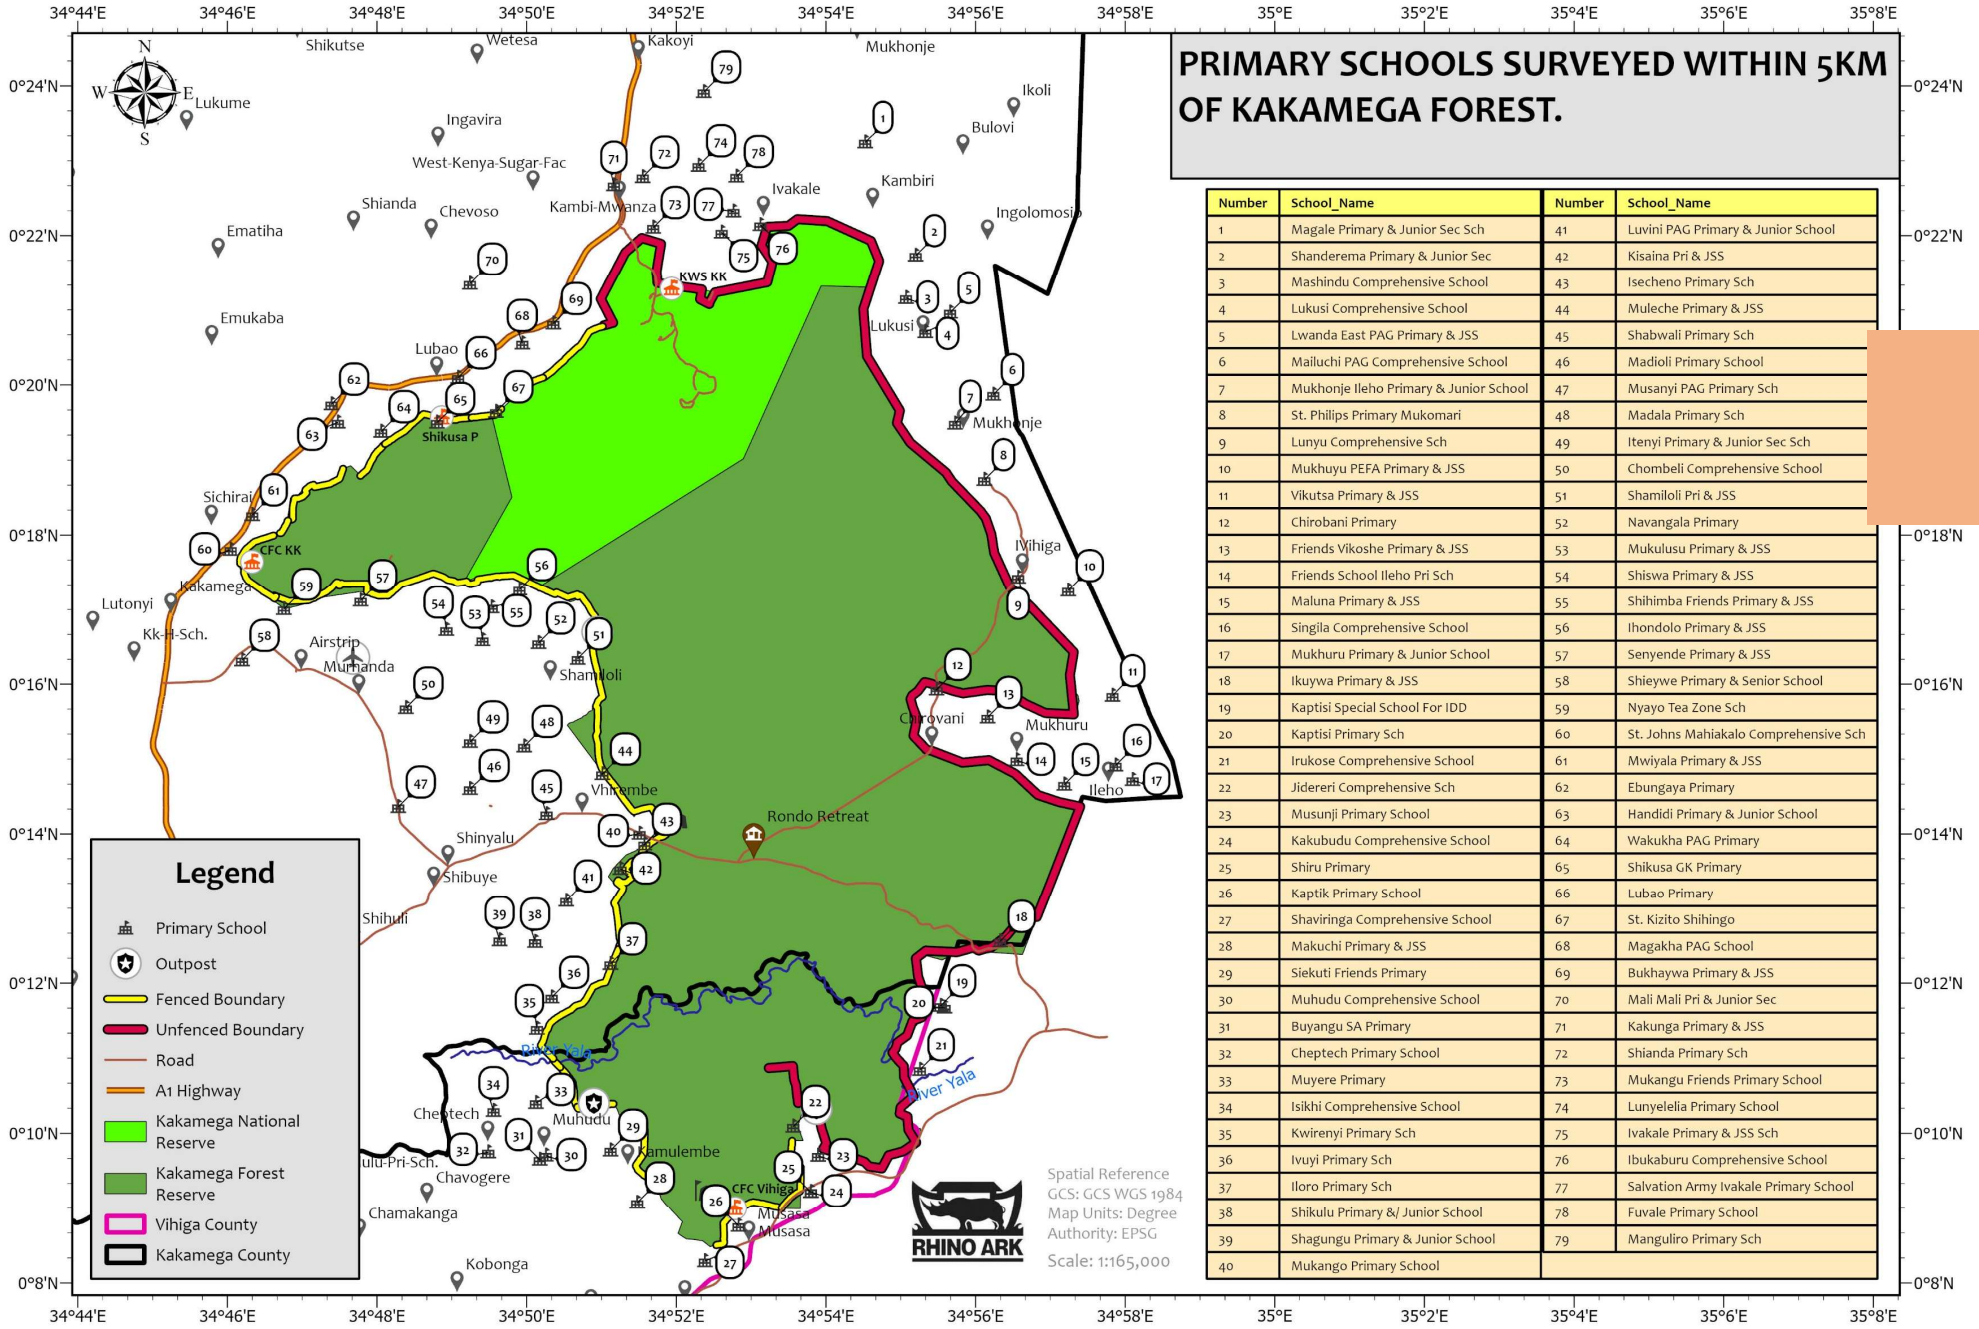

KAKAMEGA FOREST ECOSYSTEM

KAKAMEGA FENCE PROJECT MAP

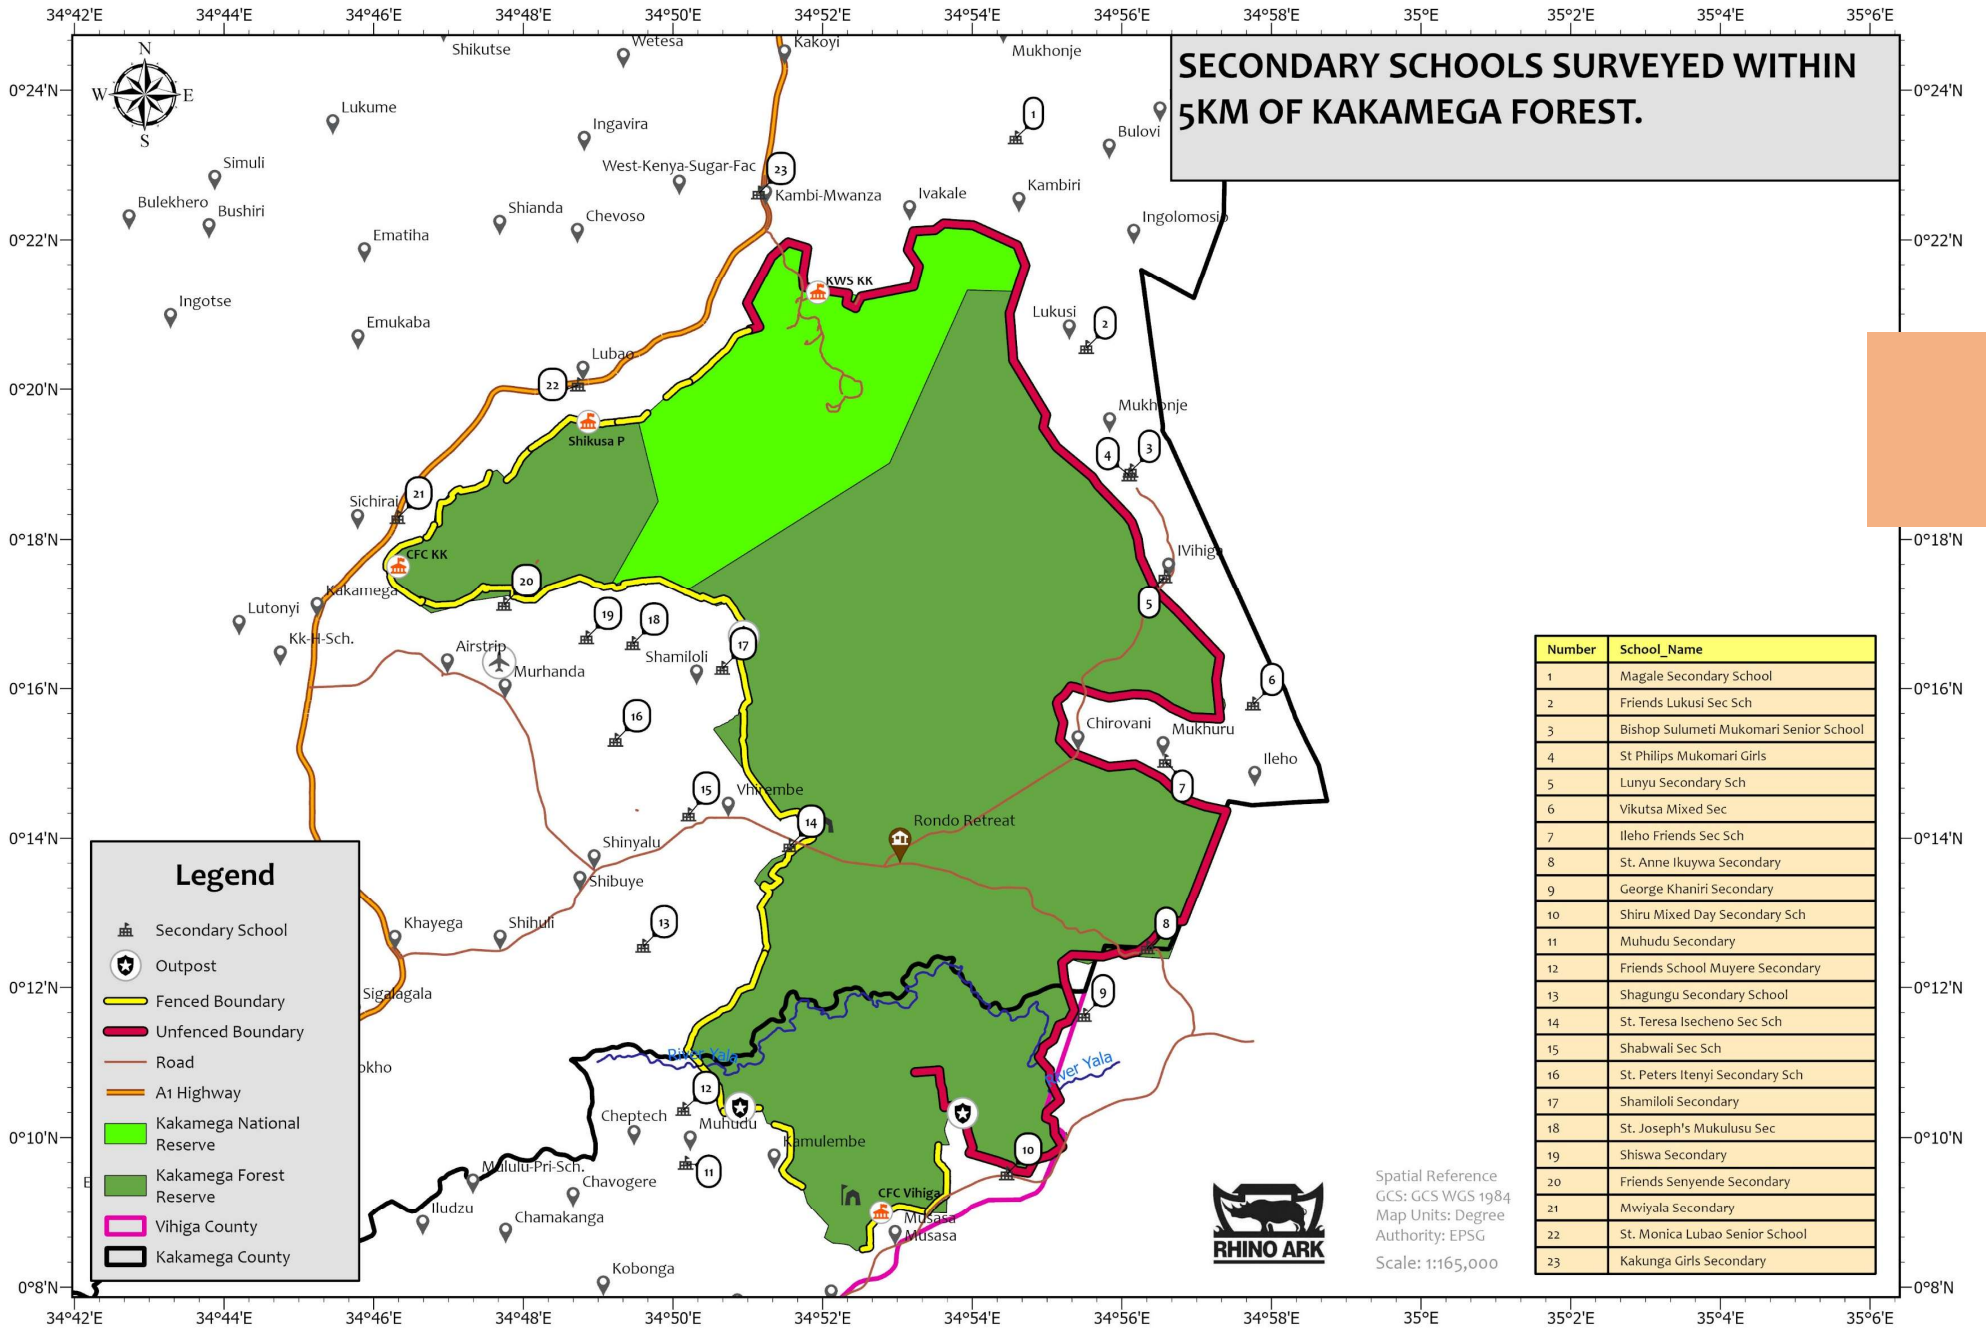

Kakamega Highlights

- Fence – 50km completed (Phase 1 & Phase 2)
- Conservation education stakeholder inception workshop done [Sept 2025]
- CEP baseline survey -102 schools bordering the forest [Oct 2025- Feb 2026]
- 25 Champions recruited and trained on RA programs/policies [Feb 2026]

PRIMARY SCHOOLS SURVEYED WITHIN 5KM OF KAKAMEGA FOREST.

Number	School_Name	Number	School_Name
1	Magale Primary & Junior Sec Sch	41	Luvini PAG Primary & Junior School
2	Shanderema Primary & Junior Sec	42	Kisaina Pri & JSS
3	Mashindu Comprehensive School	43	Isecheno Primary Sch
4	Lukusi Comprehensive School	44	Muleche Primary & JSS
5	Lwanda East PAG Primary & JSS	45	Shabwali Primary Sch
6	Mailuchi PAG Comprehensive School	46	Madioli Primary School
7	Mukhonje Ileho Primary & Junior School	47	Musanyi PAG Primary Sch
8	St. Philips Primary Mukomari	48	Madala Primary Sch

18	St. Joseph's Mukulusu Sec
19	Shiswa Secondary
20	Friends Senyende Secondary
21	Mwiyala Secondary
22	St. Monica Lubao Senior School
23	Kakunga Girls Secondary

Kakamega Challenges

- Fence – slow response times by partners on infrastructure work
- Community attitudes – continuing sensitization required
- Commitments on labour by county/KFS

RHINO ARK
